

Connecting to NERSC

Lisa Gerhardt
NERSC User Services Group

Outline: Connecting to NERSC

- **ssh – the Secure Shell**
 - The *lingua franca* of contacting NERSC
- ***NX - Accelerated X*** (also uses ssh)
 - Persistent sessions, Accelerated Graphics, KDE Desktop

- All of the computational systems at NERSC are accessible via ssh
- Each system has a set of load-balanced login nodes which offer ssh service
- Use your **NIM** username & password
- Addresses for NERSC systems:

Large-scale Systems

- edison.nersc.gov
- hopper.nersc.gov

Mid-range Systems

- genepool.nersc.gov
- pdsf.nersc.gov

Data Transfer Nodes

- dtn[1-4].nersc.gov

<http://www.nersc.gov/users/network-connections/connecting-to-nersc/>

Basic SSH use from Mac/Linux/cygwin

- If you have a UNIX-like computer, you can directly contact NERSC with your built-in ssh client
 1. Open a new terminal
 2. Enter: `ssh -l <NIM username> edison.nersc.gov`
- Depending on your preferences you might want additional ssh flags:
 - `ssh -Y` *performs robust X-forwarding over ssh*
 - `ssh -A` *forwards ssh-agent information (if you use ssh-keys)*
- **Advanced Topic: ssh keys**
 - If you choose to setup an ssh key to access NERSC systems, please use a passphrase on the key (*no unencrypted ssh keys!*)

SSH from a Windows System

- **Many ssh clients exist for Windows**
 - A very popular one is **putty**
 - <http://www.chiark.greenend.org.uk/~sgtatham/putty/download.html>
 - Advanced users might prefer to use ssh directly within **mintty** (from cygwin distribution)
- **Both of these options support all ssh features (that I've ever tried to use)**
 - For X-forwarding to work, you'll need to find X-server software
 - Cygwin/X
 - Exceed
 - Consider using NX instead of X-forwarding

Example Session

doe6933093:~ dmj\$ ssh -l <NIM username> hopper.nersc.gov ← Prompt on local system

```

----- Contact Information -----  
  
NERSC Contacts      http://www.nersc.gov/about/contact-us/  
NERSC Status        http://www.nersc.gov/users/live-status/  
NERSC: 800-66-NERSC (USA) 510-486-8600 (outside continental USA)  
  
----- Current Status as of 2013-09-09 14:35 PDT -----  
  
Compute Resources:  
Carver:             Available.  
Dirac:              Available.  
Edison:             Available.  
                    Notes: (09/09/13 14:35 PDT) - Edison is reserved for dedicated  
                    science runs on 9/12 Thursday 18:00 PDT - 9/13 Friday 6:00 PDT.  
  
Genepool:           Available.  
Hopper:             Available.  
                    Notes: (09/09/13 8:51 PDT) - /scratch access issues are  
                    affecting some batch jobs. Engineers are investigating.  
PDSF:              Available.  
  
Global Filesystems:  
Global Homes:       Available.  
Global Scratch:     Available.  
Project:            Available.  
ProjectB:           Available.  
  
Mass Storage Systems:  
HPSS Backup:        Available.  
HPSS User:          Available.  
  
----- Service Status as of 2013-09-09 14:35 PDT -----  
  
All services are available.  
  
----- Planned Outages -----  
  
HPSS User:          09/11/13 9:00-13:00 PDT, Scheduled maintenance.  
  
Data Transfer Nodes: 09/18/13 8:00-16:00 PDT, Scheduled maintenance.  
                    Maintenance on DTN01 thru DTN04.  
  
Service:           09/22/13 22:00-09/23/13 2:00 PDT, Scheduled maintenance.  
                    The NERSC production instance of Service Now (Ticket System)  
                    will be down for an upgrade.  
  
----- Past Outages -----  
  
Carver/Dirac :     09/09/13 13:00-13:11 PDT, System in degraded mode.  
                    Restarted Moab.  
  
For past outages, see: https://www.nersc.gov/users/live-status/outage-log/  
  
-----
```

MOTD: Message of the Day

NERSC will post

- system-status messages
- Upcoming maintenance
- Past outages

Make sure to look at the MOTD
to see if something is going on or
will happen which may affect
your calculations

<NIM Username>@hopper12:~>

- 7 -

Prompt at NERSC

Login Node Auto-Logout

- **Some NERSC systems won't give you unlimited time on the login nodes**
 - After 48 hours idle, Hopper & Edison login nodes will terminate your session
 - PDSF and Genepool session are unlimited

NX@NERSC – Accelerated X

U.S. DEPARTMENT OF
ENERGY

Office of
Science

Reasons for NX

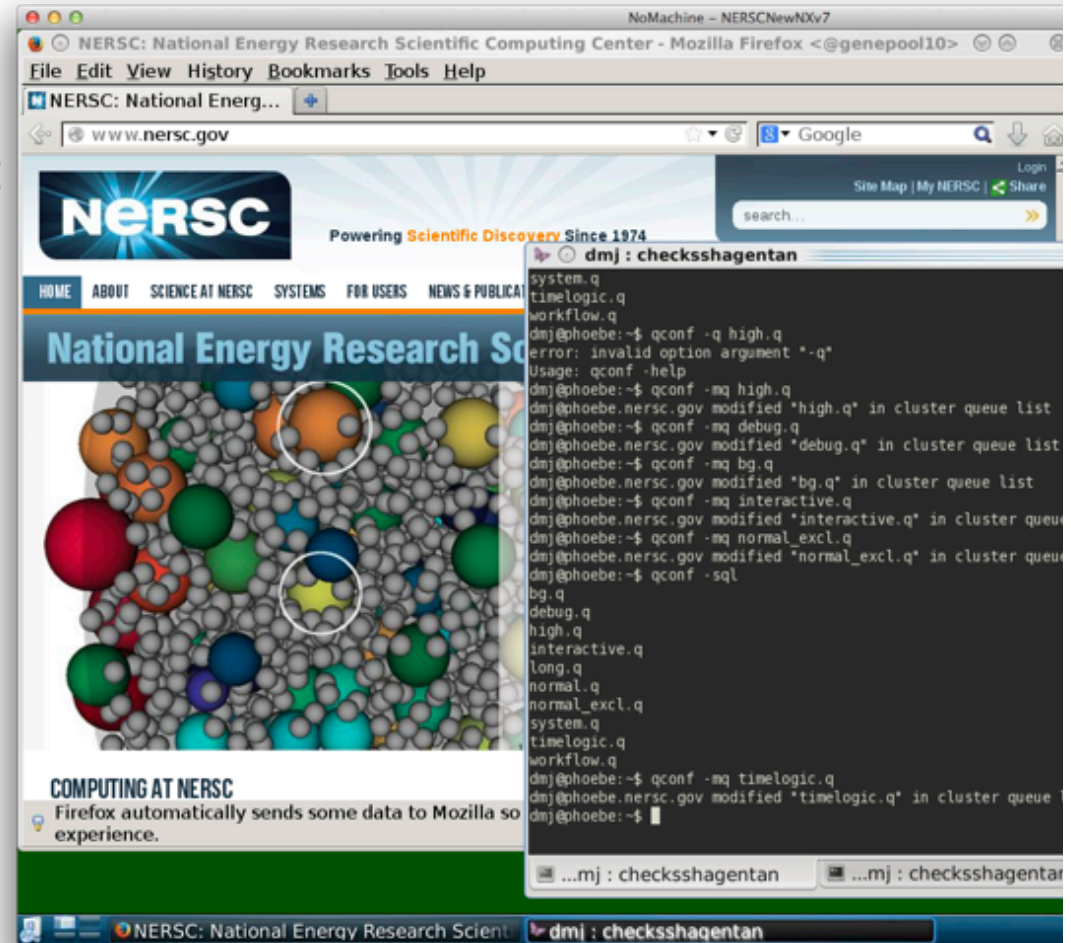

- **Slow Speeds:** X-Windows is slow over network. Remote windows from emacs can take minutes to open
- **Solution:** NX Buffers/Compresses X messages, giving much better X experience

Reasons for NX

- **Long Lasting Desktop:** NX gives you a desktop, so you can connect to NERSC resources (such as edison) and start your GUI applications.

Reasons for NX

- **Lost Connections:** If I lose internet connection, I might lose all running processes.
- **Solution:** NX provides sessions. You can suspend the session without terminating the running processes.
 - And get back to the same point when reconnected, *even from a different location or computer.*

What you need for NX

- **Any Desktop/Laptop**
 - Windows/Linux/Mac
- **NX Client Software (Free)**

NERSC NX Service

- **10 Minute Start-up Guide**

Documentation:

Go to www.nersc.gov, search for "NX"

National Energy Research Scientific Computing Center

U.S. DEPARTMENT OF
ENERGY

Office of
Science

X-forwarding through SSH

U.S. DEPARTMENT OF
ENERGY

Office of
Science

X-forwarding

- Allows you to access Visualization programs remotely at NERSC

Example:

```
localhost% ssh -l elvis -Y hopper.nersc.gov
```

...

```
e/elvis> module load vmd
```

```
e/elvis> vmd
```

```
<vmd starts up>
```

NERSC Recommends using NX instead of X-forwarding.
